--2.(Presently amended) <u>In combination, a</u> A toy <u>and a security</u> alarm ,comprising:

said <u>a</u> security alarm system for a ~~said~~ toy comprising a controller and having an armed state and an unarmed state, the controller being responsive to a signal input to at least one input thereof to cause the security alarm device for said toy to selectively assume the armed and unarmed states;

a signaling device coupled to the controller and responsive to provide an audio or visual alarm signal;

the controller causing the signaling device to provide an alarm signal with a change of state of the security alarm device for said toy between the armed state and the unarmed state.--

Claims 3-21 (canceled)

--24. (Presently Amended) <u>In combination, a</u>A toy <u>and as security</u> alarm ,
comprising:

<u>Said</u> a security alarm system for <u>said</u> a toy comprising a controller activation of an alarm, the security alarm having an armed state and an unarmed state , the controller being responsive to a signal provided to at least one input of the controller to cause the security alarm device for said toy to selectively assume the armed and unarmed states;

a signaling device coupled to the controller and responsive to provide at least one first audio or visual alarm signal representing a change in state of the security alarm device. --

--30.(Presently Amended) <u>In combination, a</u>A toy <u>and aa security alram.</u>
comprising:

<u>said</u> a security alarm system for <u>said</u> a toy comprising a controller and having an armed and unarmed state, the controller being responsive to at least one input thereof to cause the security alarm device for said toy to selectively assume the armed and unarmed device.--

REMARKS

The last office action has been carefully considered.

Applicant has amended claims 2, 24 and 30 to recite the combination of a toy vehicle and a security alarm system. It is respectfully submitted that the cited prior art
